Ex-Ray Machines

Made in America

Are Demanded

Never has there been such a demand for X-ray machines and apparatus as at the present time. The manufacturers have ordered for in advance of output and while working large forces of men are handicapped somewhat by shortages of materials. The growth of the industry is largely a healthy one, induced by domestic trade, although one market is somewhat inflated by foreign demand formerly handled by Germany and France. These nations are now apparently utilizing their own output in the army hospital service, as indicated by the fact that orders are now coming from numerous foreign countries not heretofore manufacturers.

Where there was formerly not more than one X-ray outfit in fifty doctors' offices there is now one in ten. This is due partly to the natural advance of the science of medicine and realization of the usefulness of the X-ray partly to its extension of its use to many new applications, partly to the general criticism doctors have been subjected to where X-ray had not been used in treating fractures, and partly to the fact that several states have passed laws compelling the doctor to utilize X-ray plates in fracture work. The central stations have also been working to a limited extent to place X-ray machines on their lines, as it means on an average a ten-kilowatt demand or more, and up to as high as thirty kilowatts.

After the tomato had failed in its mission to convince the bad actor of his unpopularity, it then became the plaything for would-be song writers and youthful bards owing to its euphoniousness. Now, however, owing to the improved condition of civilization the tomato is coming into its own and can be ranked as one of our leading delicacies. A tomato relish is not only tasty but it is also very appetizing. I class it as one of my favorites so will explain just how I do it.

The ingredients used are one can of tomatoes, three eggs (yolks only) one-half medium size onion, one tablespoonful of butter, one quarter teaspoonful of soda, and one-half cup of cracker dust. Cut the onion up fine and fry slightly in butter, then put in the tomatoes with salt and red pepper to taste. When the tomatoes are done enough to mash easily add soda and then cook a few minutes, stir it in cracker dust until it thickens. Then add eggs beaten light and stir tomatoes into them. Return to fire and cook slowly until thick, stirring all the time. Allow to cool and eat as a relish. If you follow out the directions carefully I can assure you that you will be agreeably surprised at the result.

At a recent dinner party given by "Dusty" Farnum after his capture of the one hundred and seventy pound Black Sea Bass I was cordially asked by the host to prepare a surprise for the guests. The tomato relish was the one the dainties that I offered. The invited guests voiced their silent approval by eating every bit.

France had 3,300,000 farm hands before the war.

(From the Christian Herald.) A lady was entertaining her daughter's caller, who was just back from a Summer outing. The conversation had been somewhat spasmodic and finally she decided to try him on some of the new books: "Have you read 'Freckles' Mr. Johnson?" she ventured. "No, ma'am," he stammered blushing, "mine are the brown kind."
